# BOX SPRINGS

modular system

A box spring bed is easily distinguished by its height, which is a look that is preferred by some people. Box springs prevent the mattress from sagging and support it properly, dispersing body weight evenly across the foundation. They add support and absorb body weight, which extends the life of the mattress. The warm feeling of a box springs bed is more appealing to certain people over the simplified look of standard beds. They provide a softer sleeping surface compared to the simple bed with mattress. The box spring beds that we offer are a combination of different options for your use, should you want to go on the cheap end or you want to immerse yourself into greater comfort. Customers may well choose between different base comfort, different mattress fillings, different bed backs and different top mattresses. Accessories to complete the aesthetics of the box springs bed are also available – options for legs and decoration cushions are at hand. It is recommended that the customer turns the mattress regularly to help increase the life of the mattress. Find inspiration in the world around you and create your personalized box springs bed.
